

JESUS CRYPT

The Believers Cryptocurrency

Whitepaper v1.1

What is Jesus Crypt?

Jesus Crypt is a 100% DeFi project created on the Binance Smart Chain network.

Its symbol is: **\$JESUS**

Its main objective is to be used as a form of daily payment. This is possible due to its speed, low network cost and it does not need to be mined to verify transactions, energy-efficient with the environment.

Jesus Crypt will integrate more medium-term goals, such as complete NFT environment marketplace, with exclusive music, images & NFT gaming.

An area of research that will lead the Jesus Crypt ecosystem and its side-projects will be to allow locked savings for stablecoins in which it could have a profitability up to 50% APY for stablecoin, and 75% APY for an LP of \$JESUS. With blockages of at least 3 and a half months. These APYs will be constant over time and will not have as high risk as other types of passive income

Why Jesus Crypt?

Jesus Crypt is a meme coin!. YES!

But “do not be fooled by bad preachers”.

There is a team of developers, engineers, marketing, advisors, social media and cryptocurrency and trading analysts behind this project. And the project would be growing.

Low Fees

Only **5%** of each transaction (buy or sell) where:

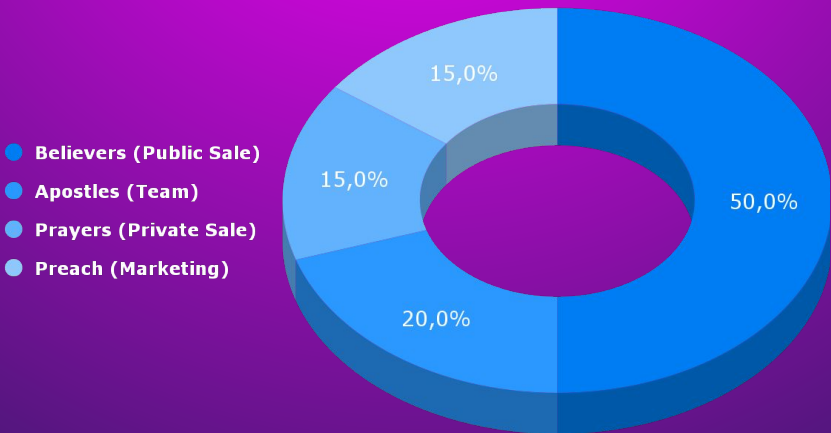

- 2% is distributed among all holders of \$JESUS
- 2% is locked as liquidity to ensure constantly increasing.
- 1% is for marketing & continue developing of the team

Why Jesus Crypt?

"This solidity contract is unique!"

- The contract source is verified
- No prior similar contracts
- Ownership renounced or source does not contain an owner contract
- Creator wallet contains 0% of token supply
- Creator wallet contains 0% of liquidity
- Liquidity pool is locked

Supply Distribution

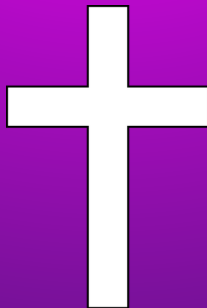

Why Jesus Crypt?

Token Crucifixion:

\$JESUS is targeted to burn 10% total supply:

- 2%, when holders reaches 1,000
- 2%, when holders reaches 10,000
- 2%, when holders reaches 100,000
- 2%, when holders reaches 300,000
- 0.5%, when holders reaches 350,000
- 0.5%, when holders reaches 400,000
- 0.5%, when holders reaches 450,000
- 0.5%, when holders reaches 500,000

Amen!

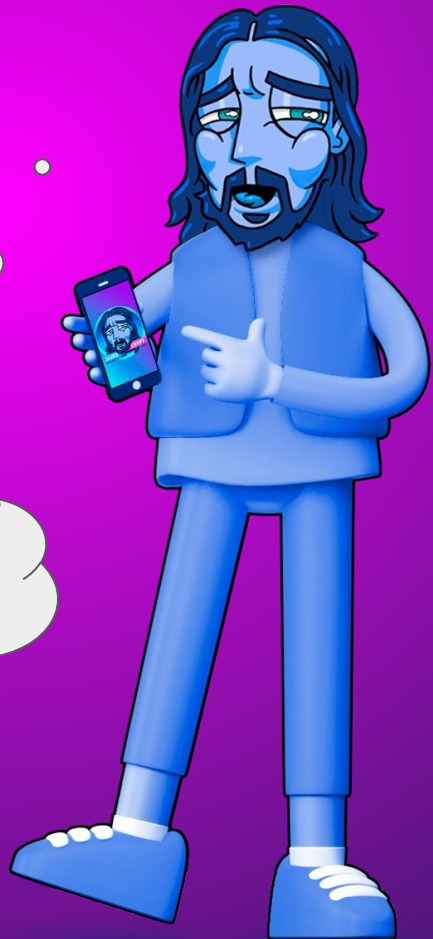

Platforms

The first fair launch in the beginning of year 2022, with locked liquidity in JESUS/BNB pair.

The decentralized exchange platforms that can be bought or sold Jesus Crypt are:

- Pancakeswap
- Poooin
- Dexguru
- Dextools

**And hope Jesus
Crypt will be in
centralized platform
as well soon**
